Corp. Stanley Miller, above, son of Mrs. Agnes Miller of 2 Fernwood Road, Larchmont, is stationed in Okinawa with the Air Force. He enlisted in November, 1949, and took basic training in Houston, Texas.

In November, 1950, Corp. Miller was transferred to Denver, Col. to the Air Force Supply School at the University of Denver. While stationed there he studied art at the university during his off-duty hours.

Partly a Mystery
Town of Mamaroneck police were quick to solve one mystery that presented itself over the weekend. At least they solved part of it.

Mrs. George Croll of 146 Palmer Avenue called the department Sunday when she found the outside patio broken on her cellar balcony. She told the cops she had been in the house and that she had heard footsteps in her driveway around 10 o'clock the preceding night and thought the same person must have broken the lock in an attempt to enter the house.

"No," said the officer after a brief look at the police records, "we can rule that out. The steps were made by Detective Sgt. Chauncey Smith and Sgt. William Cunningham of the Town force. They had been investigating an anticipatory incident in the vicinity at the time."

Uninvited 'Guests'
Three teen-aged boys who tried unsuccessfully to "crash" a party at the home of Mrs. Estelle Hager, 21 Kenmore Road, Larchmont, on Saturday night, will probably not be invited to the next party, either.

Mrs. Hager reported to Town Police at 9:50 P. M. that after they had been refused admittance at the door, the boys broke through a window and cracked another in a last desperate gesture of defiance, where a stove, which had been left on the lawn, all the way across the street.

In Training
Harold R. Keech, son of Mr. and Mrs. Rexford Keech of 323 Wagner Avenue, Mamaroneck, has completed four weeks of an eight-week Air Force indoctrination course at Sampson Air Force Base, Greenville, S. C., where he was ordered to report his enlistment for a four-year period.

During his initial training he has attended classes in mathematics, character guidance and the fundamentals of the service. In the final four weeks of his course, he will be instructed in psychological and chemical warfare and in the use of firearms.

Keech is twenty-one years old and was graduated in 1947 from Bellows High School. He was employed by Happiness Laundry before entering the service.

In July, 1949, he married the former Mrs. King, daughter of Mrs. Marie King and the late Mr. King of 1501 Franklin Avenue, Mamaroneck.

Auto Vandalism
Three cases of auto vandalism and one of youngsters looting parked cars were reported to Mamaroneck Village police over the weekend.

Saturday at 9:30 A. M. Joseph Milione of 208 Wagner Avenue reported that the side view mirror, social and three windows of his car had been smashed while it was parked overnight in front of his home.

Mrs. Helen R. Precht of Harrison reported at 11:30 A. M. Saturday that the left front window of her car had been smashed while it was parked on Mamaroneck Avenue near Palmer Avenue between 10 and 10:30 A. M.

Yesterday at 3 P. M. Reuben Strlin of 210 Wagner Avenue told police that side view mirror of his car and the mirror and door handle of Mrs. Strlin's auto had been smashed while the vehicles were parked in front of the residence.

In the final case reported a sixteen-year-old was caught at about 4 P. M. Saturday searching cars parked on the upper ramp at the Mamaroneck railroad station. He had impounded an eight-year-old Plymouth and both cars were towed. He had taken nearly a pack of cigarettes.

The boys were taken home by police and their parents are advised to administer proper discipline.

Reds Said Hopeful
He said Communist acceptance of a 52-47 proposal to start immediate negotiations on the final section of an armistice indicates "the Reds have hopes of an armistice."

Truce negotiators scheduled a full dress session Wednesday to start work on the fifth and last agenda item—prisoner exchange.

And there were optimistic predictions from an Allied member of the prisoner exchange subcommittee.

"I think we can get together and write the rest of the agreement" on prisoner exchange, said Rear Admiral George W. B. Butler, the first time, I think we are in a position to settle the nuts and bolts of the armistice."

3 Storms Converging On Eastern Seaboard

NEW YORK, (AP)—Three storms which brought the country a wide variety of weather over the weekend converged today, sending high winds and rain for New England.

One had whipped up a blizzard in the Central Rockies Saturday that took three lives, and blanketed the entire center of the continent with rain, light snow and freezing drizzle as it moved east.

A second sucked dust thousands of feet into the air over much of Texas before settling it with rain, and moved on over Arkansas into Tennessee.

A third, with winds ranging up to 75 mph, lashed the Atlantic Coast and drove a 2,600-foot freighter aground off Cape Hatteras, N. C., as it took a northwesterly course paralleling the coast.

The result was rain over the middle Mississippi and Ohio valleys, southern and eastern Great Lakes, and most of the West.

The Weather Bureau predicted that the storm will continue during the afternoon and ordered storm warnings lowered.

The storm which developed in the South Atlantic Saturday had moved northward and was expected to pass off the coast here some time this afternoon.

Three-fourths of an inch of rain fell in the city in less than eight hours.

The blizzard near Cotton, Utah, Saturday stalled more than a dozen automobiles and highway drivers reached them yesterday, three occupants of one buried car were dead of carbon monoxide poisoning.

Great clouds of red dust, swept up from drought-stricken plains of Western Texas, blotted out the sun yesterday. The dust cut visibility to three-quarters of a mile in eastern parts of the State before being washed away.

Trustees, TWU Meet To Save Third Avenue

NEW YORK, (AP)—Trustees of the bankrupt Third Avenue Transit Corp. and representatives of the CIO Transport Workers Union will meet at 3:30 P. M. today to reopen contract negotiations in an attempt to avert liquidation of the transit system.

The union stated yesterday that the scheduled meeting is the result of an invitation extended by the trustees.

I. Howard Lehman announced yesterday his resignation as CIO spokesman for the union two and a half years ago.

Judge Kaufman requested him to serve until after the Feb. 15 hearing. Lester T. Doyle is the remaining trustee.

Winnie Judd Still At Large; Hunt Spreads To All Arizona

PHOENIX, Ariz. (AP)—The search for Winnie Ruth Judd, redneck murderer, arrested 21 years ago, spread throughout Arizona today, with police admitting they had no idea where she is stationed and because he is overdue for parole.

Officers were alerted to border areas from border to border because he had been ordered to watch all points of entry into the state and particularly roads leading into Mexico where some think she may be hiding.

She was two weeks.

an appropriate and efficient training program."

Programs Outlined
Mr. Billings outlined the three major types of work-shop programs now in use in New York State.

One program, he said, is set up to give school students experience in retail sales and office skills on a part-time basis in their senior year. Another program provides work experience for each pupil as a part of his general social and economic education, rather than as training for a particular skill. This is usually arranged between the school and local employers on a schedule of one period a day, or a comparable time after school, by the State for full-time training.

The program particularly favored by the State for full-time training, is the Dodge Coronet Convoy, which Mr. Billings said, is that known as "Industrial Cooperation Education," under this system pupils now included in the "forty-two out of 100" program, are trained in such local industry and half a day in the school building on an alternate basis.

In the case of a slow meter, the company will refund the amount of the difference in the amount of gas used during the month.

The refund payment is being made under PSC approval on suspension from the time the meter is replaced back to the billing date following P. S. 1951. For example, a heating gas customer whose meter is customarily read on the 15th of the month and whose meter was changed Dec. 15 and found to be more than

CHALLENGE TO OUR COLLEGES

SELECTIVE Service headquarters announces that of 20,000 college students who took the most recent draft deferment examinations 39 per cent failed.

That, it seems to us, does not reflect any great prestige upon our colleges. The examinations were not especially difficult...

Accordingly, here at least is one outstanding failure for which some explanation from our collegiate institutions is decidedly due.

BAD EYE-SIGHT? IF IT be true, as President Truman has openly asserted that Presidential primary elections are nothing but "eyewash," why is it that such ordinarily intelligent American citizens as Dwight F. Eisenhower, Estes Kefauver, Harold Stassen, Robert A. Taft and Earl Warren are submitting their names in such primaries?

And if it was "eyewash" last week when Mr. Truman said he would withdraw from the race, why did he not say so when we call it this week when he says he will stay in there?

In politics, as in so many other fields, it appears, hindsight is a lot better than foresight.

PLENTY OF LETTUCE

HERE is, advises the U. S. Department of Agriculture, an unusually abundant crop of lettuce rolling into our Westchester markets from Arizona, Florida and California.

The 1952 supply is, indeed, so heavy that growers are faced with a serious marketing condition, and hence have appealed to the department for help.

Lettuce, a good source of Vitamin A and C, contains small amounts of iron and calcium. These food values are retained best when the lettuce is eaten raw.

So, for salads, for sandwiches, for garnishing meat and fish platters, lettuce is the ticket right now. Why not take advantage of the lowering prices?

UN-AMERICAN ACTIVITIES PROBERS

THE very nature of the office, the chairman of the House Committee on Un-American Activities has been prominently in the headlines. There is such wide public interest in the investigations that this is but natural.

But, overall, the Committee on Un-American Activities has done a magnificent job. It awakened the nation to a fifth column which many at first refused to admit.

By DR. CHARLES EARLE FUNK HEADLINE ASK QUESTION Question: "Please explain the difference, if any, between 'some' and 'any'."

Answer: I am sorry that you did not quote a few of those sentences to give me a better notion of your problem, as you have used both "some" and "any" quite correctly in your inquiry.

NOTE: In the pronunciation of "interesting" and "interesting," some recent editions indicate that the usual British "in-ter-est-ing" and "in-ter-est-ing" are accepted here also.

Question: "Kindly distinguish between 'through' and 'thru'."

Long Overdue Revolt Starts As States Fight Land Seizing

WASHINGTON—A states rights revolt against the Federal government's high-handed methods of seizing local property under strained interpretations of the interstate commerce clause has broken out in Capitol Hill and in several state legislatures. It has been long overdue, in the opinion of these legislators.

With unprecedented swiftness and bipartisan unity, the Interstate Commerce Commission and the Insular Affairs has unanimously entered a "hands off" warning to Washington. It declares all Federal agencies must respect the laws, judicial decisions and regulations of the states, territories and possessions in the acquisition of land for Federal use.

The full committee, in response to the demand of Democratic and Republican members from every section of the country, is expected to meet promptly to consider the embattled states' ultimatum, which was introduced as a resolution by Representative Carl Fagle of California and Hamer H. Budge of Idaho.

ENCROACHMENT—The battle being waged by Attorney General J. Edgar Hoover's shrewd tactics in taking water from small landowners in the Santa Margarita region in Southern California for reactivated Navy-Marine installations. Violating long-established water rights, his program will run many irrigated farms nearly un-usable.

The Justice Department insisted on invading this area, even though the Defense Department had previously made arrangements to meet its needs and respecting the rights of states and cities against matters water. It is charged that the Justice Department is seeking subversion on the ground of national security in the leasing of land.

But the Santa Margarita affair is only the climax to growing protest of states and cities against Federal encroachment in many fields—appropriation of land, hoarding of taxes and a general disregard of state sovereignty.

SAFEGUARD—Western states are especially concerned because the Federal government owns 60 per cent of the land in this area, and so per cent in certain states. In pursuing his public power program, Interior Secretary Oscar Chapman has used this pretext to override local claimants on land and natural resources disputes. He has been defeated in every court test on this issue.

So, the original Encroachment measure simply sought to safeguard against the Federal government's use of water, which is liquid gold in this section. But the final bill, as endorsed by the full subcommittee, was broadened to give Federal encroachment anywhere without the process of law and without proof that the action was essential to national welfare and security.

Welfare Board Opposes Opening of Relief Roll for 1952 (AP)—The State Board of Social Welfare urged the Legislature today to kill a bill that would permit counties to open relief rolls for public assistance. The recommendation by the 15-member board, which leads the Dewey administration's Social Welfare Department, was regarded as a decisive blow against a controversial measure introduced by Republican Senator Henry A. Wise of Waterbury. It would authorize local boards to make public the names of persons on relief and welfare rolls and how much they get.

making Larchmont their headquarters are Jack C. Warner, administrative head, of 463 Palham Road, New Rochelle, brother of Herbert Warner, and Stowey J. Hild, research director, of New York City.

All general office and stenographic personnel Jack Warner said in a brief interview yesterday, are local residents.

"They're a fine staff," he said, "and we're so efficient as New York City office staffs. In fact I've noticed that most such office workers commute from the suburbs anyway and often thought they'd be glad to do the same work nearer home. And so they are."

Mr. Warner, speaking for the executive staff, said he was glad to be out here, too.

"In fact," he declared, "we moved out here because we got tired of breathing exhaust fumes and standing in line for lunch. Most of our work is done either by mail or by traveling to the actual mills anyway, so we're just as well situated here as we would be in the city, not to mention the difference in rent... Why did we pick Larchmont? Why not? We live here."
